Summary Findings: New Condominium Apartment Price Indexes (2017–2024)

Key Trends Across Cities and Provinces:

General Observations (2017–2024):

⇒ Cities experienced varying growth trends in condominium price indexes, influenced by local market dynamics.

⇒ Most cities saw price increases, while a few faced declines or fluctuations during the period.

Province and City-Specific Findings:

Ontario

- **Ottawa**:
  - ⇒ Consistent growth throughout the period, increasing from 100 (2017) to 143 (2024) (43% growth).
  - ⇒ Strongest growth occurred between 2019 and 2020 (15.4% increase).
- **Toronto**:
  - ⇒ Moderate growth overall, rising from 100 (2017) to 136 (2024) (36% growth).
  - ⇒ Experienced a slight decline after 2022, dropping from 139 (2022) to 136 (2024).

British Columbia

- **Vancouver**:
  - ⇒ Moderate growth until 2022, peaking at 122.
  - ⇒ Declined slightly to 118 (2024), showing 18% overall growth from 2017.
- **Victoria**:
  - ⇒ Significant growth until 2022, peaking at 145.
  - ⇒ Declined to 137 (2024), with a 37% overall increase.

Quebec

- **Montréal**:
  - ⇒ Steady growth, rising from 100 (2017) to 121 (2024) (21% growth).
  - ⇒ Minor fluctuations in 2023, but rebounded in 2024.
- **Quebec City**:
  - ⇒ Declined from 100 (2017) to 95 (2024) (5% decrease).
  - ⇒ Largest drop occurred after 2021.

Alberta

- **Calgary**:
  - ⇒ Declined from 100 (2017) to 78 (2020) before recovering sharply to 106 (2024) (6% overall growth).
  - ⇒ Largest recovery occurred between 2023 and 2024.

- **Edmonton**:
    - ⇒ Declined from 100 (2017) to 87 (2021) before rebounding to 103 (2024) (3% overall growth).
    - ⇒ Recovery was slower than Calgary's.

Nova Scotia

- ⇒ Consistent growth from 100 (2017) to 123 (2021), followed by stabilization at 120 (2022–2023).
- ⇒ A slight recovery in 2024, ending at 121 (21% overall growth).

Key Insights:

1. **Strongest Growth**:
    - ⇒ Ottawa (43%) and Victoria (37%) showed the most significant growth among all cities.
2. **Declining Markets**:
    - ⇒ Quebec City was the only city with an overall decline (5% decrease), indicating weaker market dynamics.
3. **Recovery Trends**:
    - ⇒ Cities like Calgary and Edmonton demonstrated sharp recoveries after early declines, signalling improving market conditions in Alberta.
4. **Market Stability**:
    - ⇒ Cities like Halifax and Montréal displayed steady growth with minimal fluctuations.
